

HCO WASHINGTON

HCO BULLETIN OF JUNE 3, 1957

Herbie Parkhouse over in London sent me the following report on his session with a 10 - year old child.

"I knew her mother had been messing her up by telling her how much she was like Mama, and how weak Mama was. So I ran a Present Time Problem on Solid Terminals, then Give Me Your Hand - Thank You. The PTP was o.k. GMYH produced immediate change by the girl using all the normal childish ways of trying to stop the Auditor. After about 1½ hours she went Anaten, but good, for 1 hour and then came out of it. I carried on for ½ hour - everything seemed ok so we had lunch.

"After lunch I went back on to GMYH, but only just checked PTP (not very thoroughly). Within a very short period - 10 minutes - pc was Anaten. This lasted for approximately 1 hour when pc rallied into present time, changed her body position to that of a 'lady reclining in a chair' - just like Mama - and doped off. This also lasted about 1 hour, then pc came up to present time - then into enthusiasm which lasted well after I ended the session. After tea I gave her another 1 hour on GMYH with no apparent change at an enthusiasm- when I say anaten on this case, I mean the pc was doing the process, not even mechanically most of the time, but eyes shut and doped.

"After this she felt good. I then sent her home to her father and step-mother - both of whom have had lots of auditing. They couldn't believe the difference, especially after only six hours. The child is now in better condition than she has ever been before.
