H G C Running of PCs

Use CCH O with PT Problem, SCS and Connectedness to
get pc under auditor control and no longer.

Then use Step 6 Clear Procedure as soon as possible
and until end of intensive. Some Objective Havingness can
be run if necessary.

Repair havingness on invisible and black objects in
fields which are invisible or black. The test is "Shut
your eyes - what are you looking at?" They'll tell you
and you establish whether field is invisible or black.
Then use the above. Otherwise (if mock ups are clear)
don't use it.

What can you mock up easily? PC says "An apple".
Do so. (Note meter) (if reaction on meter choose some-
thing else).

The command then is "In front of that body, you mock
an apple (pause) and keep it from going away. Did you keep
it from going away?" PC says he did. "Thank you." The
next command is "Behind that body, etc." The next is "Above
that body etc". The next is "To the right of that body,
etc." The next is "To the left of that body etc." Then one
begins the series again with "In front of that body etc."
This is continued until E-meter no longer registers a surge
when pc does it. Now pick a larger object. Test it for
surge on the meter. If meter surges, don't use it, pick
another etc. Now go through same series. One runs this
on at least 6 objects each one larger until he goes on to
next, hold it still.

Keep it from going away, when flat on many objects, is
followed by the same command substituting "Hold it still."
This is done before, behind, above, below, to the right, to
the left the same way around and around. When hold it still
is flat one goes to "Make it a little more solid", same
command otherwise as before.

If this all flattens, start all over again now with
more significant objects. Read Step 6 Clear Procedure.
