HCG Clear Procedure Outline
of February 6, AD 8

Working with the 19th ACC and staff auditors a more easily applied clear procedure has been developed. To a large extent it ignores "fields" since what is a reactive bank but a kind of "field". Fields are too likely to be validated by auditor. They aren't that important. They can be by-passed. They will vanish. The procedure is given here in brief.

1. CCH O. Emphasis on PT problem and clearing help. People with fields resist help. If pc isn't gaining clear help again later.

2. If pc very low on APA run CCH 3 & CCH 4. If pc unconscious to begin start with Tr 5 (bed or chair) then CCH 1, CCH 2.

3. Run Start-Change-Stop (not Stop-C-S.) PC walking about etc as given in Mechanics of Control,(Dist. Center $1.00 Book).

4. Run Connectedness, Control version, "You get the idea of making that (indicated object) connect with you."

    a. Subjective Connectedness. "What action could you take against that (pc's) body." Make sure he is sure he could. This takes over protective automaticity (screens).

    b. Connectedness, permissive. "You look around here and find something you might make connect with you."

5. Union Station Destroy. "You invent a way of destroying that (indicated) person." This is run outside on people chosen at random. It is done to take over destructive automaticities.

6. Encourage pc to create mock-ups he knows he himself has made. Use simple forms. Take care not to invalidate his mock ups. Ignore fields. Get pc to make mock ups he can see. Then use such mock ups for running Step 6 of Clear Procedure Booklet.

    It is Step Six of Clear Procedure Booklet that makes clears. Mocking an object up on 6 sides of body and having pc keep it from going away, then hold it still on 6 sides, then make it a little more solid on six sides of body. Run 6 objects each on 6 sides of body on keep it from going away. Then similarly with same objects "hold it still", then, similarly same objects "Make it a little more solid." (There is no acknowledgment by auditor after pc mocks it up and keeps it from going away or the "Did you." There is Ack only after full command is executed. Otherwise acks will thin pcs mock ups.)

    A clear is nul on All mock ups. He knows he is mocking up bank. He can mock up bank.

                                          L. Ron Hubbard
