CLEARING REALITY

A new rule.

In the absence or unreality of a terminal the significance in a process will not function.

In other words, the significance of help will not function on a tooth unless the pc is given a reality on the terminal of a tooth.

On a nervous-dispersed case, there is no real gain in running significance until hellos and okays are run on something.

Command "You say hello to that body."
      "Have the body say okay to that hello."
      "Have the body say hello to you."
      "You say okay to that hello."

When pc has misemotion off the interchange, then run help in brackets on the same terminal.

Establish the reality of a terminal before you try to clear it with significance.

A pc in extreme pain can be audited if one clears reality on the hurting terminal and then runs brackets in help on that terminal. Note: Extreme control must be used in attempting this.

The above applies to objective terminals. Subjective might or might not work.

                              L. Ron Hubbard
