Staff Auditor Hats

Post Case Analysis Routine

When pc has been taken to the Director of Processing or case analyst (third party enters auditing picture in any way) the auditor must then

REESTABLISH THE AUDITOR with

- (1) Two way comm on analyst person
- (2) "Who would I have to be to audit you successfully."
- (3) "What am I doing."

This is to avoid pc transferring to case analyst as auditor and then not coming back to session.

This is also done when pc has coffee shop auditing between sessions.
