

H.C.O. BULLETIN OF OCTOBER 27, 1958

HOW TO READ PROFILES ON A.P.A.: COMPARING
CURRENT WEEK PROFILE WITH WK BEFORE

Drop on critical = havingness drop.

Whole line (or majority of points) drops = ARC breaks with auditor.

Line doesn't change (same as before) = p.t. problem not touched by auditor.

Rough auditing = reduction of havingness.

Drop in Responsibility from former week = Auditor evaluation.

Drop in Composed = loss of auditor. Poor CCH-0 in Find the Auditor.

Drop in Comm Level = double acknowledgment by auditor, cutting pc off before finished.

Drop in Appreciative = lowered reality level.

Nervous is toughest point to raise on a graph. It is done by finding the auditor. This is a primary point to watch in low profiles. Did preclear find auditor. CCH-3 and CCH-4 are the indicated processes for these low ones. They were designed to find the auditor.
