How to Write and Extension Course Section

An Extension Course Section consists of a textbook and a series of lessons done on a glued-top table, one sheet per lesson, eight questions or exercises per lesson. The questions are consecutively numbered from 1 to 160 with the identifying letter on each number. Example: Section B, third question, is 3B. The name of the textbook but not its page numbers, is carried on every lesson page, not each question.

We only want the questions for the section, not the printed complete product.

The questions concern only vital definitions needed for a knowledge of the subject and examples of the use and meaning.

To do a course, use the following:

(1) Make a list of all vital definitions used in the text specified on the subject. These should number around eighty so pare or expand the list until it is composed of eighty vital words or phrases or objects:

Use the definition for odd numbered questions:

Demand an explanation, an example, a discovery from real life, a consequence etc., of the definition as the following even-numbered question.

The Extension Course should give the taker a passing knowledge of dianetics and Scientology terminology phenomena and parts. This is its goal and purpose. The reasoning or examples in a text are considered secondary, for the purposes of the course, to precision definitions.

The Extension Course Student should finish the course with the feeling he is dealing with a precision science, composed of identifiable parts.

Example (not necessary to use):

Question 5A: What is a reactive mind?

Question 6A: Give something out of your own experience that would illustrate a reactive mind at work.

The main tasks imposed here are (1) To summarize the important definitions and parts of Dianetics and Scientology from a text and (2) Ask interestingly for an application to life.

Now you see why I want your swift help in writing it. It would take one person months. Your contribution, as assigned in this bulletin, will speed it up by months.
