CLEARING COMMANDS

Excerpt from HCO Bulletin of July 28, 1958

**CLEARING COMMANDS:** Clear each word with the full phrase once each with the following:

"What is the usual definition of the English  
(or other language) word \_\_\_\_\_?"

Do not ask for definitions over and over as a repetitive command.  
If pc's definition is poor, clear command every few commands.

Clear only each different word in a bracket. Don't clear each line in a bracket.
