CLEARING COMMANDS

Excerpt from HCO Bulletin of July 28, 1958

CLEARING COMMANDS: Clear each word with the full phrase once each with the following:

"What is the usual definition of the English
(or other language) word _____?"

Do not ask for definitions over and over as a repetitive command.
If pc's definition is poor, clear command every few commands.

Clear only each different word in a bracket. Don't clear each line in a bracket.
