HAS Co-Audit.

Here are some hints on how to run Comm Processes on assessment:

The instructor asks the Preclear if he is sick or well. If the PC says he is ill then the instructor says "What part of the body would you say is ill?" Whatever the PC answers, this is then run on "From where could you communicate to a (generalized terminal) body part." If the PC answers that he is well, the instructor says "Have you ever been ill?" The PC will in general say yes. The instructor then says "What part of your body was ill?" and runs the Comm Process on whatever the PC says.

Giving you advance scoop on a new research win it seems that the most effective and rapid clearing could take place with what we will call Universe Processes. This means running a Comm Process on Universe as follows:

"From where could you communicate to the physical Universe."

"From where could you communicate to a body."

"From where could you communicate to a mind."

"From where could you communicate to a Thetan."

This is all experimental at this stage but it would be a separation process from all universes the thetan is anxious about and should be quite successful in general use.

However I give you this not to use but to show you that we would probably win further and better if we began to steam people up on the subject of being clear and then slammed right in on whatever universe they could handle on co-audit. I would then run co-audit as follows:

Do the actions described above on body part and when the PC has come through that go at once onto the physical universe and then graduate him on to any body part that bangs on the meter and finally when various parts are flat get him into running the body as a general terminal.
