HCO BULLETIN OF SEPTEMBER 29, 1959
(Issued in L. A.)

UNIVERSE PROCESSES

I have just been checking out a process series we will call "UNIVERSE O/W". It is a killer in sheep's clothing.

Assessment is done with an E-Meter to discover which of four things has the greatest difference of needle pattern. One does not look for a drop. He looks for the one of the four that is different than the others.

The four are:

THETAN OR SPIRIT
MIND OR BRAIN
BODY OR MALE BODY OR FEMALE BODY
PHYSICAL UNIVERSE OR EARTH OR CONTINENT OR
TOWN OR HOUSE OR DWELLING

One uses different ways of putting these things if he doesn't get instant difference on call off Spirit; Mind; Body; Physical Universe. If he does get a different pattern from the rest he proceeds to audit that discovered thing as follows:

"Think of something you might have done to a _____?"
(The _____ being the terminal you discovered)

Alternated with:

"Think of something you might have withheld from a _____?"
(Same terminal)

Because these dive backtrack so fast the question may not be a direct recall "what have you done to" since that implies certainty.

This could probably be a specific for illnesses of the chronic type.

This is an allowable process in HGCs.
