HCO BULLETIN OF SEPTEMBER 25, 1959
Correcting HCO Bulletin of September 21, 1959

BPI Present Time Problem Processes

There was a typographical error on the 3rd line of the 2nd paragraph. Please amend your copy as follows:

"It must exist in PT and have 2 (two) terminals in it to be a PTP."

HCO BULLETIN OF OCTOBER 5, 1959
(Issued at St. Hill- Reissued at LA.)
When is a Process Flat.

BPI (Addition to HCO Bulletin dated September 7th, 1959)

I wrote a Bulletin dated September 7th, 1959, stating when a process is flat, I failed to mention that this was only on processes which were running terminals. In other words processes such as Connectedness would be considered flat according to the old recognised rundown.
