

HCO BULLETIN OF OCTOBER 5, 1959  
(Issued at St. Hill- Reissued at LA.)  
When is a Process Flat.

BPI

(Addition to HCO Bulletin dated September 7th, 1959)

I wrote a Bulletin dated September 7th, 1959, stating when a process is flat. I failed to mention that this was only on processes which were running terminals. In other words processes such as Connectedness would be considered flat according to the old recognised rundown.
