Co-Audit Inst. Hat.
Staff Auditor Hats.
Dir. of Processing Hat.

HCO BULLETIN OF JANUARY 21, 1960

Responsibility

Responsibility is often misdefined by the pc.

The definition for auditing of responsibility is "Admit causing," "able to withhold". Usable commands would be "What about a (terminal) could you admit causing". "What could you withhold from a (terminal)". "What could you admit causing".

Responsibility as a word can still be used as itself in an auditing command.
