HCO BULLETIN OF JUNE 16, 1960

CALLING ALL AUDITORS ABOUT HELP

After several weeks of getting grooved into Help processing we have a clearer picture of progress made, of refinements of running, and above all - of the fundamental importance of this basic approach to a case.

A pc approaches us to be helped in some way, he probably feels Life has dealt him a raw deal and that as a 'Victim' he is very much effect of the dreadfully unfair things which have 'happened' to him. We, with the wider knowledge of life that Scientology gives, know that a person becomes aberrated only by means of his own, not another's actions. Others can obviously influence and harm us IF we let them. We usually do and until this fact becomes clear through our own cognition, go on blaming others. This, of course, gets us nowhere fast. Life is just as full and happy as our communication to other life forms is free - without fear, blame or hesitancy. Any other attitude but trust and understanding will build barriers of resistance between ourselves and those we live and work with. This cuts down life potential tremendously.

Now, how to get this over to a 'victim' pc?

Help does it and fast. Our results from all over the world this week have been better than ever. Clear cut differences in profiles, with greatly changed considerations and advances in IQ.

Tackle a case with pre-session and easy two-way comm. on the Deadly Quartet. This brings the confusion off in clouds - shake as many O/Ws out as possible, but don't run them. An easier pc now grooves into Model Session, finds his goals - clears his Auditor, if necessary, with Two-way Help; PTP personnel with O/W; and will tell you whom or what he wants to help. Find this out, and pick up the first terminal he ever tried to help in his history of Dianetics and Scientology. If the needle is sticky start with Concept Help. This run with Alternate Confront and plenty of Havingness is a powerful combination. Ron explains that your difficult pc only 'helps' a terminal he finds impossible to confront so by running that terminal we are re-stimulating him. Alternate Confront helps him Look at this term: and you have a happier pre-clear. Don't forget the Havingness - 'Look around here and find something you could have'. He needs enough.

Go on from here to Help O/W on assessed terminal and run FLAT, FLAT, FLAT. Never leave a terminal until the needle is NUL. ONE terminal really flattened progresses a case far more than several half runs. This is very important.

Remember a pc's case is his valences. If he were basically himself he wouldn't need you. Help strips valences, but while he is a combination of them, it is no good running Responsibility as such. He will gleefully make his Aunt Matilda entirely responsible and this doesn't solve anything.

Responsibility can be used at this stage only for easing off an unwisely chosen terminal. Run old O/W Alternate Confront or Responsibility.

Run general terminals in preference to near PT specific ones. Back track comes flying up? Continue to run Help. Dating incidents is not necessary here and will break into a fast working process, so don't be tempted.

Control. If pc is interested in his case he'll be in control, so don't run it. If he is in urgent need of control run CCHs but he'd have to be psychotic or unconscious.

These are the latest tools Ron has handed us. They are geared for the job of clearing ANY pc. Use them intelligently, keep ARC high and have the intention to Clear. You will.
