HCO BULLETIN OF SEPTEMBER 22, 1960

ANNOUNCING NEW TECHNOLOGY

The advent of H.A.S.I. Ltd. has been celebrated by a new break through on cases.

In order to improve ACCs I brought the 7th London ACC to Saint Hill and made it the 1st Saint Hill ACC.

During the six weeks this class of forty students was in progress, I was able to test out new materials which advanced their cases, some of them for the first time.

Advancing all cases was the goal of this ACC and the students were also trained to do this.

The break through, then, consists of a successful reaching of all case levels among Scientologists.

The meaning of this to Scientology is that we are virtually finished with slow case gains or no case gains.

Formerly clearing has extended only to those cases which could be rapidly advanced. This left more than half the cases ineligible for clearing. This difficulty has now been disposed of in the technology of the 1st Saint Hill ACC.

Of course this far from ends research, I can now get on with technology of fast clearing. But, at least, we've included us all in, now.

Staff Auditors of the HGC in London were present on this course and now know and understand this new technology.

The key to all cases is the inability to have. Twenty new havingness processes and two new theories were developed for this course before or during it. I have been very busy on this project.

We have a new milestone in Scientology. We are finished with failed and slow cases amongst all Scientologists. The results of these benefits are now available through every HGC in the world.

I think this was a good way to celebrate the birth of H.A.S.I. Ltd., don't you?
