HCO BULLETIN OF DECEMBER 15, 1960

Franchise Holders.

PRESESSION 37

A pre-session is run without a model session.

Pre-session 1 and 37 are the only pre-sessions now in regular use.

Pre-session 37 is a method of getting off withholds. This problem is the primary case problem. Pre-session 37 resolves it. This pre-session is now the proper way to run "What question shouldn't I ask you?"

The auditor runs "What question shouldn't I ask you?" for a few times.

Then the auditor runs "Think of something you've done." "Think of something you have withheld." Alternated for a short time (maximum five minutes).

Then the auditor runs "What question..." a few more times.

If the pc develops an evasion system such as "you shouldn't ask me if I have murdered anybody." The auditor asks it. The pc says "No, I never have" etc. Then the auditor must reword "What question..." to "What question would embarrass you." or "What would you hate to have the police or your husband or whatever find out about you." Vary "What question" so that you get off the withholds.

Always run Pre-session 37 until you have a no-response to question needle with E-Meter sensitivity at 16.

The O/W on this is to keep up the havingness.

Formula 16

A formula is always run in Model session early in the case or to get it moving again.

Formula 16 is as follows:

Failed help is run with:

"Whom have you intended not to help?"

"Whom have you helped?"

This is run for about 10 minutes, then the following is run for about twenty commands or so:

Assess P.T. terminals. Take first one that falls. Assess every time. Run:

"What unkind thought have you had about (terminal)?"

Then switch back to the above failed help version.

This is for cases that don't respond well on ordinary O/W.

Formula 17

Help is run as two-way failed help on an assessed terminal which has to do with a healing profession or religious or mystic person.

continued.....

Then "What unkind thought have you withheld from a person?" is run for havingness.

This is for the person who has been to healers, hypnotists, spiritualists, psychologists, ministers, religious family members, psycho analysts, etc. etc. This also works on doctors, psychologists, etc.

One makes the assessment list from general terminals and specific persons connected with pcs past. One assesses each time from the list and takes the first one that drops. The drop is barely run off before switching to the thought O/W on "a person".

Two-way failed help is run as follows:

"How could you fail to help a....."

"How could a.....fail to help you"

Positive failed help:

"How could you help a....."

"How could a.....help you" should also be run if indicated. (If pc insists they helped).
