HCO BULLETIN OF FEBRUARY 9, 1961

NEW PRESESSION DATA AND SCRIPT CHANGE

Presessions

The use of Presession 37 should be limited to about 2 hours at the most.

As a case progresses it becomes conscious of more witholds. Therefore Presession 37 can be run at intervals as a case goes along, briefly each time.

Model Session Script Change

For the purpose of getting all the witholds off a case, a new line is now added to the Model Session.

Immediately after "Is it all right if I audit you?" insert the line "Are you witholding anything?"

With the discovery that many non-progress cases are not progressing because of heavy undisclosed witholds, the subject of witholding is graduated up to take permanent residence in the rudiments as above. Therefore it could be said that Presession 37 is actually repeated in the rudiments but, of course, remains itself.

Formula 19 is a better thing with which to slug a case than long runs of Presession 37. If you suspect witholds you can't rapidly get, Formula 19 speeds up the whole case and gets real gains at the same time.
