HCO BULLETIN OF MARCH 2, 1961

FORMULA 20

Formula 20 is an effort to run Control on a thought level. It is relatively experimental.

It is for cases that have much alter-is as represented by inability to duplicate commands. Also for cases that have unsteady engram banks that shift.

The commands are:

"Who has failed to control you?"
"Who have you failed to control?"
"What has failed to control you?"
"What have you failed to control?"

and

"Who have you helped?"
"Who has helped you?"
