SCRIPT OF A MODEL SESSION
(Cancels HCO B of October 13, 1960, same title)

I have brought the Model Session up to date, including "witholds" and changing "we" to "I" and "the" to "this" session throughout to reduce randomity. I have also added the proper processes to run at Rudiment level.

A Model Session is a Model Session because of its "patter", not because of specific processes. This is a handy script of the "patter of a Model Session". Use it. Don't vary it. Know it by heart. It is the mark of a well trained auditor. By making all patter the same, later sessions run out earlier sessions.

This does not enjoin against two-way comm; but reduce auditor comments and chatter in sessions, if you want smooth results and no ARC breaks.

START OF SESSION

Auditor: "Is it all right with you if I begin this session now?"

Pc: "Yes."

Auditor: Acknowledges. "Start of Session!" (Tone 40).

Note 1:   If pc says "no", Auditor two-way comms concerning objections, then asks again "Is it all right with you if I begin this session now?"

Note 2:   If pc is doubtful as to whether the session has started:

        Auditor: "Has this session started for you?"

        Pc: "No."

        Auditor: Acknowledges. "Start of Session!" (Tone 40). Then, "How has the session started for you?" If pc still says "No", the Auditor says "We will cover it in the Rudiments" and continues the session.

RUDIMENTS

1. Goals

Auditor: "What goals would you like to set for this session?"

Pc: Sets goals.

Auditor: Acknowledges. "Are there any goals you would like to set for life or livingness?"

Pc: Answers.

Auditor: Acknowledges.

2. Environment

Auditor: "Is it all right to audit in this room?"

Note 3:   If not, use Tr 10 (see note 15) or pc's Havingness process.

3. Auditor Clearance

Auditor: "Is it all right if I audit you ?"

Note 4:   If not, clear objection, or use TR5N (see Note 16) or "Who should I be to audit you?" or "Who am I?" depending on nature of difficulty. If TR5N seems to worsen the ARC break, run O/W on Auditor (see Note 17).

4. Witholds

Auditor: "Are you witholding anything?"

Note 5:   If so, get withold off or run Presession 37, (HCO B Dec 16, 1960).

5. Present Time Problem

Auditor: "Do you have any present time problem?"

Note 6:   If so, clear problem, or use "What part of that problem have you been responsible for?"

START OF PROCESS

Auditor: "Now I would like to run this process on you (name it). What would you say to that?"

Pc: Answers.

Auditor: Acknowledges. Clears the command for pc only for the first time the command is used.

Note 7: If, during clearing of the command or failure of needle to react, it seems that the pc will not be able to handle or do the announced process profitably, Auditor says: "According to what we have been talking about, it would seem better if I ran (name another process)."

END OF PROCESS

1. Cyclical

Auditor: (wishing to end process) "Where are you now on the time-track?"

Pc: Answers.

Auditor: Acknowledges. "If it is all right with you, I will continue this process until you are close to present time and then end this process."

Pc: Answers.

Auditor: Acknowledges. Auditor continues the process, asking after each pc answer, "When?" until the pc is close to present time.

Pc: Answers close to present time.

Auditor: Acknowledges. "That was the last command. Is there anything you would care to say before I end this process?"

Pc: Answers.

Auditor: Acknowledges. "End of process."

2. Non-Cyclical

Auditor: "If it is all right with you I will give this command two more times and then end this process."

Pc: Answers.

Auditor: Acknowledges and gives the command two more times.

Pc: Answers.

Auditor: Acknowledges. "Is there anything you would care to say before I end this process?"

Pc: Answers.

Auditor: Acknowledges. "End of process."

Note 7a: The cyclical ending is only used on terminals that exist also in present time, or when pc is going into the past in his answers. It is not used after pc says he is in present time. Non-cyclical is used when the pc is running terminals which do not exist in present time or when the cyclic aspect can be neglected.

REPEATED COMMANDS

Auditor: Gives command.

Pc: "I don't know. I can't find any answer."

Auditor: Acknowledges. "I will repeat the auditing command." Repeats the command.

Note 8: If pc still cannot answer, two-way comm to discover why.

COGNITION

Auditor: Gives command.

Pc: (Not having answered command yet) "Say, that mass in front of my face just moved off."

Auditor: Acknowledges. Repeats command without announcing that it is a repeat.

END RUDIMENTS

5. Present Time Problem

Auditor: "Do you have any present time problem now?"

Note 9: If so, run "What part of that problem have you been responsible for?"

4. Witholds

Auditor: "Are you witholding anything?"

Note 10: Pulls withold or runs Presession 37.
