HCO BULLETIN OF 19 OCTOBER 1961

Franchise

(Reissued 18 November 1987. Only change is to correct a typographical error. Correction in script.)

SECURITY QUESTIONS MUST BE NULLED

The main danger of Security Checking is not probing a person's past but failing to do so thoroughly.

When you leave a Security Check question "live" and go on to the next one, you set up a nasty situation that will have repercussions. The person may not immediately react. But the least that will happen is that he will be more difficult to audit in the future and will go out of session more easily. More violently, a pc who has had a Security Check question left unflat may leave the session and do himself or Scientology considerable mischief.

About the most unkind thing you could do to a person would be to leave a Security Check question unflat and go on to the next one. Or to fail to null the needle on withholds in the rudiments and go on with the session.

One girl, being audited, was left unflat on a Security Check question. The auditor blithely went on to the next question. The girl went out after session and told everyone she knew the most vicious lies she could create about the immoral conduct of Scientologists. She wrote a stack of letters to people she knew out of town, telling gruesome tales of sexual orgies. An alert Scientologist heard the rumors, rapidly traced them back, got hold of the girl, sat her down and checked auditing and found the unflat Security Check question. The withhold? Sexual misdemeanors. Once that was pulled, the girl hastily raced about correcting all her previous efforts to discredit.

A man had been a stalled case for about a year. He was violent to audit. The special question was finally asked, "What Security Check question was left unflat on you?" It was found and nulled. After that his case progressed again.

The mechanisms of this are many. The reactions of the pc are many. The summation of it is, when a Security Check question is left unflat on a pc and thereafter ignored, the consequences are numerous.

THE REMEDY

The prevention of Security Check *questions* being left unflat is easily accomplished:

1. Know E-Meter Essentials.
2. Know the E-Meter.
3. Work only with an approved E-Meter.
4. Know the various bulletins on Security Checking.
5. Get off your own withholds so that you won't avoid those in others.
6. Repeat questions in various ways until absolutely sure there is no further needle reaction on a question with sensitivity 16.
