CCH ANSWERS

The following queries and my reply are useful in the CCHs.

Ron from Ray = 1/8 = 335L

Thanks for Telexes 233L2 and 334L2. That's fine.

Some queries have come up about CCHs. Could we have the latest stable data on -

- 1) When is a physical origination picked up - after command is executed and before acknowledgement, or after acknowledgement?
- 2) Does one pick up by saying - 'How are you doing?' 'What happened then?' or 'I noticed - 'So and so - happened. What's going on?' - or is there any other methods that we don't have and which is better than any of these?

Love
Ray

Ray from Ron = 15.30 = 2/8 = 335L2

1. When it happens.
2. Only by a two way comm query like "What's happening?"

Never designate the origin.

Don't make a system out of queries. Three commands nicely done is flat.

Don't take spoken data from PC about somatics as a reason to keep on.

Also the process that turns something on turns it off.

Love
Ron.
