TO BE GOALS LINE LISTING

The following is a 24 line listing for a beingness type goal.

The method of running is to place the heading on 24 consecutive legal length pages so that one exists for each line.

The method of running is to clean up the goal so that it fires three times at the beginning of session and then simply list for the remainder of session, putting in Middle Rudiments only at such times as the pc has obviously gone out of session.

These lines are listed exactly four items on each line in rotation. After the four items have been written a short strike mark is put under the beginning of the last item written so that the auditor can easily see when he has listed the next four.

The above directions will apply to all types of lines listed, beingness, doingness and havingness goals, but different wordings have to be used for doingness and havingness goals. NOTE: These lines are not ordinarily prepchecked or made to fire before being used on a pc.
