HCO BULLETIN OF MARCH 17, AD13

URGENT

R2 - R3

CORRECTIONS

TYPOGRAPHICALS AND ADDED NOTES

HCO BULLETIN OF MARCH 13, 1963 ISSUE II

In the Line Plot, correct just below "The Most Screamish," "Goal Small RS" to "Goal Small RR." Correct below "Loud Voices" "Goal Small RS" to "Goal Small RR". A goal always Rocket Reads in the early part of a line plot. It does not RS until somewhere around "Whatever might make a sound." Before starting into the GPM a goal must RR. Do not take an RSing goal as the goal. On Prepchecking it, a goal that originally is found by RS will begin to RR. In some cases the GPM Item first contacted from a goal oppose list may not RR but RS.

Delete the arrow from "The Goal To Scream" to "Happy People." Extend arrow from "To Scream" to "Happy People".

Also the goal oppose list may have given "The Most Screamish" instead of "A Mute". This is quite ordinary. If so, then the horizontal arrows throughout the plot would be pointing to the right in each case and the arrow from the "Goal Oppose List" would point to "The Most Screamish" instead of "A Mute." And the diagonal arrows would go from the terms down to the left to the next oppterm. Which way these arrows face is of small importance so long as the line plot shows which RI came, on listing, from which RI.

If you did not get an RI from an RI you listed or got one wrong way to, put all Items found on the Line Plot anyway.

The span of a GPM mentioned in the 4th paragraph page 1 of HCO Bulletin of March 13, 1963 is only approximate and has no actual technical value.

Page 3, 3rd paragraph from bottom: change figure 12 to "about 20".

HCO Bulletin of February 15, 1963. Last Paragraph, first line (following numeral 8) last word: Change to "Rocket Reading" not "Rockslamming" as given. R3 deals in Rocket Reads.

Add to HCO Bulletin of February 15, 1963:

GENERAL NOTE

A pc who is reading small on a meter should be listed at higher sensitivity than 4.

The sensitivity rule is:

IN LISTING, SET THE SENSITIVITY LOW ENOUGH TO MAKE CONSTANT METER ADJUSTMENT UNNECESSARY AND HIGH ENOUGH TO BE ABLE TO SEE THE PC'S READS.

Some auditors strew their reports with question marks instead of RSes and RRs after Items because they have their sensitivity too low.

Mask your listing paper from the pc with any barrier. If a pc sees what RSes or RRs he or she may start to represent it and wreck the list.

Seat the pc back far enough from the auditing table so you can see the cans in his or her lap and tell whether or not the pc is fidgeting with them.
