HCO BULLETIN OF JULY 9, 1963

A TECHNICAL SUMMARY
THE REQUIRED SKILLS
OF PROCESSING
AND WHY

Here is where we stand and where we're going.

An auditor, to make a Clear or O.T., has to be able to handle confidently certain skills.

Today we assume that every successful process we ever had is and was a valid process. We are at a point of summation and valuation as we are achieving excellent and steady progress even on the most unlikely cases. I consider that the period of basic mental research has ended and the period of adjustment of skills, on which I will for some time be engaged, has been entered upon.

I list here the auditor skills which are requisite to handle any case.

SKILLS BY CASE LEVEL

Case Levels 8, 7 and 6

Objective processes

Reach and Withdraw Commands
CCHs
Havingness Processes

Case Levels 7, 6 and 5

Model Session
Repetitive Command Processes
R2H
Meter Reading
Simple Assessment of a form.

Case Levels 6, 5, 4, and 3

Assessment of Levels.
Listing and nulling Lists.
R3R
3N

These constitute, to use another table, the following exact skills:

Handling the pc's body (as in Reach and Withdraw or 8c).
Ability to execute the auditing cycle.
Ability to give repetitive commands.
Ability to handle a meter.
Ability to run a Model Session and keep the pc in session.
Ability to read a Tone Arm.
Ability to accurately meter date.
Ability to run R2H.
Ability to locate and handle ARC Breaks.
Ability to assess a simple form.
Ability to find a level.
Ability to list, complete and nul a list.
Ability to run R3R.
Ability to do 3N.

- Ability to do a form line plot for a GPM.
- Ability to do a Line Plot for an off beat GPM.
- Ability to list for and find a goal.
- Ability to list for and find a top oppterm.
- Knowledge of the Time Track.
- Knowledge of the Thetan.
- Knowledge of the basics of Life.
- A General Knowledge of Scientology.

(Note: The abilities of R3R, R3N and R2H are also listed separately in the above.)

These, briefly, are the skills required to make an O.T. They are well taught at Saint Hill. They are practised in Central Orgs as fast as released. HCO Bulletins exist on nearly all this material, except some fine points of R3R which are known but not yet written up, and some of the R3N Line Plots not yet issued.

BASIC SKILLS

If you examine the above you will find that where the auditor cannot do the required skill the faults are only one or more of the following:

- Cannot execute the auditing cycle.
- Cannot execute an auditing cycle repetitively.
- Cannot handle a session.
- Cannot read a meter.
- Cannot study and apply Scientology data.

Given the ability to execute the auditing cycle once or repetitively, handle a session, read a meter and study and apply procedures, all the above listed auditing skills are easily acquired and successfully done.

Therefore in looking for the reasons for no results, one finds the failure to apply the required procedure and in tracing that, one inevitably finds one or more of these five basics amiss in the auditor.

It is no longer a question of whether Scientology works, it is only a question of whether the auditor can work Scientology. If he or she can't, then the trouble lies in one or more of these basics.

The trouble does not lie with the procedure or with the pc. Of course some procedures above are harder to do than others and some pc's can worry an auditor far more than others, but these are incidental and are very junior to the five basics above.

The lower the case level of the auditor, the harder time he or she will have grasping the know-how and using it. For instance a squirrel is only a dramatizing Case Level 6 or 7. A student having a rough time is a Case Level 6 or 5. Somebody almost heartbreaking to teach is a Case Level 7 or 8. BUT, with alert guidance and even making mistakes, I have seen Case Levels from 3 to 8 alike getting wins and finally smoothing out on the five basics above. I've seen it myself in the past two years of training at Saint Hill. So I've discarded Case Level as an index of auditing ability, it is only an index of how-hard-to-train.

The question of psychotic or neurotic does not enter. These are artificial states and have no real bearing, surprisingly enough, on Case Level. My belief in an auditor's ability to audit has far more bearing on his auditing than his or her aberrations.

The only factor left is auditor judgment. This varies about and improves with wins. But processes are so arranged that it is a question only of what is the highest process that gives T.A. action, rather than pre-session case estimation. Trial and error is the best test. I would use it myself, for I have often found the most unlikely pre-clear (at first glance) capable of running high level processes and some very "capable" people (at casual inspection) unable to see a wall. So I always run the highest level

that I hope pc can run, and revise on experience with the pc if necessary.

FORMER TRAINING

As all modern courses and Academies have stressed basic skills as above for some time, no past training has been lost.

Those who learned R2-12 are much better fitted to do R3R and 3N than those who did not.

We look on any auditor today to be able to do repetitive processes but remember, that was sometimes a hard-won ability and old Book and Bottle was developed to assist it.

People who learned Pre-hav assessing or goals finding are definitely well progressed.

Anyone who can do the CCHs successfully will always find them handy.

So I count no training lost. And I am about to collect all earlier processes that worked on psychosomatic ills and publish them, since being careful not to do healing has not protected us at all and we might as well take over the medical profession for I now find that only their trade association has been firing at us in the press. So that opens up a use for almost all training on processes ever given.

If an auditor has learned the above basics he or she can easily do the long list of skills required for Clearing or O.T.

CLEARING

We can clear to keyed-out clear or clear stably. I have considered it necessary to stress thorough clearing. We are on a longer road but a more certain and stable road when we erase the Time Track or sections of it. Clear is now Case Level 2.

The main goal, however, is O.T., due to the general situation. When we were attacked I decided on a policy of:

- (1) Hold the line on the Legal Front and
- (2) Accelerate research to O.T. as our best means of handling the situation.

Both these policies are being successful in the extreme and I hope you agree with them.

By courtesy, one GPM run gives a first goal clear. No further test is done.

One chain of engrams completed is an R3R one-chain clear. This is easier than you might think.

Theta clear at this time is a Case Level 2 that is exterior.

O.T. is a Case Level 1 complete with skills rehabilitated.

The route to these states is very well established and is contained in the first list above.

HOURS OF PROCESSING

Cases require as many hours as they are located on the Case Level Scale. The lower they are the more hours they require. The higher they are the less they require.

As some index, I have had about 800 hours lately including all techniques from R2-12 forward, much of it purely research auditing on myself as a pc, developing procedures and getting line plots. Barely 250 hours of this was effective auditing. And I am definitely on the easy last half to O.T.

In a period of about half that, Mary Sue achieved 10 goal clear and has just completed her first assessed R3R chain. This included all the R3 goals work, the research of R2-12 on her as a pc, as well as R3N and R3R. Effective Auditing, given the data now known, amounted to about 150 hours or less.

A guess to O.T., given a skilled auditor and training on all modern data as above, and an able pc, would be less than 500 hours to a one chain R3R clear. This expectancy is being fulfilled on the Saint Hill Course for those now in Z Unit. To this would have to be added any processing time necessary to get the pc up to R3R. I consider that O.T. lies on the sunny side of 1,000 hours of processing now for cases that can be audited.

DIFFICULTY OF CLEARING

No case is really easy. A higher state attained is an uphill fight. So don't underestimate the difficulty of clearing.

We went too long on the Time Track before developing and working at Scientology.

BUT we can do it. And it is a lot more than worthwhile - it is vital that we do it. If we miss now, we may be finished. For there is no help elsewhere and there never has been this technology or any successful mental technology. And just now nobody cares but us. When we've succeeded all the way everybody will want on. But not yet.

My own job is very far from an end. The job of getting the purely technology developed and organized is practically over, unless you consider a recording of the full technology as part of the job. I've only recorded essentials and am just writing the last bulletins on those. But ahead is a vast panorama of research on other dynamics and enormous amounts of other technology.
