HCO BULLETIN OF JULY 24, AD13

R3N  
CORRECTIONS

This HCO Bulletin corrects HCO Bulletin of July 14, AD13. Please note and attach to all copies HCO Bulletin of July 14, AD13 and HCO Bulletin of April 17, AD13.

LINE PLOT RI

Omit the fourth paragraph of the HCO Bulletin of July 14, AD13. Substitute "In the pattern change 'Beings (People) (Those) who goal' to "Beings who (last word of goal)" for a non "to be" goal and "Beings who are (last word of goal)" for a to be type goal. Example: for To Find the RI is "Beings who Find". For To Be Dead the RI is "Beings who are Dead."

DATE CHANGES

Due to the track grouping incidents in the Between Lives implants, the actual periods of the goal types have been hard to verify. I have now done this and the following is a table of the actual periods as verified.

Correct all prior dates given where they are at variance with this table:

(All trillions given are one million million)

Helatrobos Implants

38.2 trillion years ago to  
52 trillion years ago.

Aircraft Door Implants

216 trillion years ago to  
315 trillion years ago.

The Gorilla Goals:

319 trillion years ago to  
83 trillion trillion trillion years ago.

The Bear Goals

83 trillion trillion trillion years ago to about  
40.7 trillion trillion trillion trillion years ago.

The Glade Implants

(Called Black Thetan in the discussion on  
HCO Bulletin of July 14, AD13. Please change to  
"Glade Implants")

40.7 trillion trillion trillion  
trillion years ago to  
5.9 trillion trillion trillion  
trillion trillion years ago.

The Invisible Picture Goals

5.9 trillion trillion trillion  
trillion trillion years ago to  
(Found but not fully determined)

The Minion Implants

Not yet determined to  
Not yet determined  
Pattern not determined yet.

### An Undetermined Series

That goes "Sleep, sleep, sleep,  
sleep, sleep, don't sleep, can't sleep."  
And other commands similarly arranged,  
which may be the first GPM.

---

There are at least two series of Time Grouping Type Implants that stretch and restimulate and date first trillion trillion trillion trillion years of the Time Track from the Year Zero. One of these extends from Present time back to one's arrival on Earth. Another similar one may be earlier. These sometimes interfere with years ago dating. Their dates from beginning of track are correct, however.

### FALSE PICTURE IMPLANTS

There are several of these, the Darwinian Implant being the most notable in recent times.

---

The Earliest Implant yet found is "The Story of Creation" which contains multiple endings and false durations (it is about  $7\frac{1}{2}$  weeks long) and some purposefully indecipherable pictures. It is around 70 trillion trillion trillion trillion trillion trillion trillion years ago.

### THE LENGTH OF TRACK

The best current data on the length of the time track is estimated at about one trillion trillion trillion trillion trillion trillion trillion or less. The earliest date yet found is "The Story of Creation", but an earlier incident is known to exist.

(Note: Correct also the note at the end of HCO Bulletin of July 14, AD13. Instead of:

"All trillions used are U.S. trillions which are 1,000 million"

It should be corrected to:

"All trillions used are U.S. trillions which are 1,000,000 million (one million million)"
