PREP CHECK BUTTONS
(Cancels previous issues)

The following order and number of Prepcheck Buttons should be used wherever "an 18 button Prepcheck" is recommended. Do not use the old order of buttons.

The full command is usually "(Time Limiter) (On subject) has anything been " or "Is there anything you have been " for some of them which don't fit with "Has anything been " The (On) may be omitted. The (Time Limiter) is seldom omitted as it leads the pc to Itsa the Whole Track. On an RRing goal found and used in R3SC the (Time Limiter) "In this Lifetime" can be used with good effect. All Service Fac questions or Prepchecks must have a (Time Limiter).

In running R4 (R3M2), pc's actual GPMs, the goal and RIs are Prepchecked without a (Time Limiter) as pc is on the whole track anyway. But in all lower levels of auditing, particularly when using a possible goal as a Service Fac, the (Time Limiter) usually "In this Lifetime " *must* be used or pc will become Over-Restimulated.

In order to avoid most GPM words, for all uses the 18 Prepcheck Buttons now are:

SUPPRESSED

BIG MID RUDS

It will be noted that the first 9 are the Big Mid Ruds used as "Since the last time I audited you has anything been?"

A USEFUL TIP

To get the Meter clean on a list during nulling the list the easiest system is to show the pc the list and just ask "What happened?" This saves a lot of Mid Ruds.

TWO USEFUL PAIRS

When trying to get an Item to read the two buttons *suppress* and *Not-Ised* are sometimes used as a pair.

To get a pc easier in session the buttons *Protested* and *Decided* are sometimes used as a pair.

DIRTY NEEDLE

Mid Ruds (called because Middle of Session was the earliest use + Rudiments of a Session) are less employed today because of the discovery that all Dirty Needle phenomena is usually traced to the auditor having *cut* the pc's communication. To get rid of a Dirty Needle one usually need ask only "Have I cut your Communication?" or do an ARC Break assessment if that doesn't work. A Dirty Needle (continuously agitated) always means the auditor has cut the pc's Itsa Line, no matter what else has happened.

Chronically comm chopping auditors always have pcs with Dirty Needles. Conversely, pcs with high Tone Arms have auditors who don't control the Itsa Line and let it over-stimulate the pc by getting into lists of problems or puzzlements, but a high Tone Arm also means a heavy Service Fac, whereas a Dirty Needle seldom requires Mid Ruds or prepchecks. It just requires an auditor who doesn't cut the pc's Itsa Line.

THE OLD ORDER OF PREPCHECK BUTTONS

The following buttons and order were the original buttons and may not be used, as they include GPM words which would make the pc uncomfortable in some cases if over-run.

SUPPRESSED

MISTAKE (BEEN MADE)
