HCO BULLETIN OF 27 JULY 1965

Replaces HCO Bulletin of 22 May 1965 which replaced HCO Bulletin of 23 April 1964. HCO Bulletin of 23 April 1964 was written by Roger Biddell and is corrected by this Bulletin.

SCIENTOLOGY III
AUDITING BY LISTS

The earlier genus of this process was Sec checking on the Joburg. With no reference to these, I recently developed for Level III a process called Auditing by Lists. Any list can be used.

As a preview to the process I asked staff member Roger Biddell to use List One. The questions were generalized. Instead of "Have I _____?", "Has there been _____?" was used. Otherwise the question remained the same as given in the HCO Bulletin for L.1. He ran the process for some hours on a preclear with excellent results and summarized my verbal and written instructions as applied.

AUDITING BY LISTS
L.1.

Use meter at sensitivity 16.

Use ARC Break assessment list 1. The questions asked are generalized and without time limiters.

i.e. Has a withhold been missed?
Have you been given a wrong goal? etc.

Begin with list 1. Ask the first line of this list while watching the meter for an instant read.

If the line does not read, say "That's clean" and move on to the next line of the list and do the same action with this new line.

If the pc has something to say about a line that is clean, let him say it, acknowledge it and then you ask the next line. Don't Q and A.

If the line when asked has an instant read say "That reads" then "What do you consider this could be?" or "What considerations do you have about this?"

Let the pc answer all he wants to. While he is giving his considerations - mark down any blowdowns of the TA.

When the pc has given all his considerations say "Thank you. I'll check the line on the meter" and call the line again. If it instant reads say "There's another read here" then again ask for considerations etc.

Continue these actions until the line goes clean.

When clean say "That's clean".

Then move on to the next line.

When list 1 is completed, and then list 1, then list 1 and so on.

If running correctly - the TA total should increase from session to session. The pc should get more and more blowdowns on his considerations. Then he should get blowdowns on what he considers the main thing is.

Don't Q and A. Don't take up or do anything with the pc's considerations. Don't ever say "That still reads." It's always "Another" read" as "It still reads" makes the pc feel he has not answered the question.

This process gets charge off the case.

If pc still wonders what the main charge on a line was, tell him according to what gave the most TA action.
