                            CONCLUSIONS

A Non-Cyclical Process (i.e. a repetitive process which does not cause the preclear to cycle on the Time Track) is concluded precisely as stated in HCO Bulletin 3 July 1965.

A Cyclic Process - a repetitive process which *does* cause the preclear to cycle on the Time Track as in Recall type processes must be concluded in Model Session as follows:

   "Where are you now on the Time Track?"

   "I will continue this process until you are close to present time."   (After each command ask "When?")   When the pc is in PT, "That was the body of the session."
