HCO BULLETIN OF 19 NOVEMBER 1965

Level I

PROBLEMS PROCESS

This is an extremely fast process for use at Level I to handle problems. The process commands are simply:

"What is the problem?"

"What solutions have you had for that problem?"

One gets the pc to give his problem then runs TA off solutions. Then a new statement of the problem and more questions about solutions.

These commands are run in very strict muzzled style - no additives or diversions whatsoever.
