(Reissued 24 June 1988 to correct a
typographical error. Correction in
script.)

SERVICE FACSIMILE

A Service Facsimile is a computation generated by the being
not the bank. An example of this is:

"All horses sleep in beds."

Such a computation locked away in the mind will obviously
precipitate many compulsive doingnesses, beingnesses and
havingnesses.

An example of a doingness precipitated by the above
computation would be:

"Making beds for horses."

If on assessing for a Service Facsimile you get "Making beds
for horses" as the service facsimile please note that it is a
doingness and not a computation, so if you fit the doingness into
the bracket of Service Fac Commands, i.e.:

How does "Making beds for horses" make you right?

How does "Making beds for horses" make others wrong?
etc.,

then observe very carefully exactly what the preclear says,
because he might give the EXACT WORDS OF THE ACTUAL SERVICE
FACSIMILE-"ALL HORSES SLEEP IN BEDS". And observe very care-
fully and note all meter reaction to what he or she says.

Note all of this, remembering that you were NOT running a
real Service Facsimile in the first place, and that in order to
really flatten all the compulsive doingnesses, beingnesses and
havingnesses precipitated by the basic computation you will have
to run the exact computation in the Service Fac bracket.

If the doingness you run is a basic one then it is possible
that the preclear will blow all the charge on the Service Fac and
this you will assess by pc indicators and meter phenomena (i.e.
free needle).

It is obviously best to get a real Service Fac (computation)
and taking beingnesses, doingnesses and havingnesses as Service
Facsimiles if done by auditors must be thoroughly understood.

Service Facsimile auditing can give great gains, so
understand what you are doing with *this* technology and have many
wins.
