**SUB ZERO RELEASES
EXAMINER'S SAFEGUARD**

The Pc Examiner in the Department of Examinations, employs the FAST FLOW SYSTEM in examining Pc's sent for Release declare. If in doubt when faced with raw meat Pc who seems to show nowhere near the expected awareness level for the grade of release he or she has come in for (Grades 0-IV), the Examiner simply tells the Pc that he is going to assess a list and that the Pc does not have to say anything unless he wants to.

THE AWARENESS LEVELS from the GRADATION CHART are then assessed from the bottom-34 up (to-52 when published).

When the Pc's AWARENESS LEVEL is called the needle will float. This will be most real to the Pc and he will probably comment on it.

The Examiner stops at that instant, indicates the floating needle. The Examiner notifies the Auditor that a Sub Zero Release has been obtained. The Pc is now ready to receive auditing on the level on which he originally came for declare and will be returned to the Auditor.

This verifies that the indicators didn't justify the grade of Release being claimed prior to finding the Sub Zero Release.

NOTE: A good dictionary should be at hand. If no float is obtained, find out if the Pc is hung up on any word, and clear it using the dictionary.

The Fast Flow System is observed, assess first, if any trouble arises from misunderstandings, clear it.
