REQUIRED REVIEWED FOR SOLO AND VII

(Compiled from earlier HCOBs and TAPES of
the early 60's to give the exact stable
data.)

THE LAWS OF LISTING AND NULLING

(Star Rate. No attestations
allowed, clay and demos required)

The following laws are the ONLY important rules of listing
and nulling. If an auditor doesn't know these he will mess up
pcs thoroughly and awfully. An auditor who doesn't know and
can't apply these is not a Level III auditor.

LAWS

1. The definition of a complete list is a list which has only
    one reading item on list.

2. A TA rising means the list is being overlisted (too long).

3. A list can be underlisted in which case nothing can be found
    on nulling.

4. If after a session the TA is still high or goes up, a wrong
    item has been found.

5. If Pc says it is a wrong item it is a wrong item.

6. The question must be checked and must read as a question
    before it is listed. An item listed from a non-reading
    question will give you a "Dead Horse," (no item).

7. If the item is on the list and nothing read on nulling, the
    item is suppressed or invalidated.

8. On a suppressed list, it must be nulled with suppressed.
    "On _____ has anything been suppressed".

9. On an item that is suppressed or invalidated the read will
    transfer exactly from the item to the button and when the
    button is gotten in the item will again read.

10. An item from an overlisted list is often suppressed.

11. On occasion when you pass the item in nulling, all sub-
    sequent items will read to a point where everything on list
    will then read. In this case take the first which read on
    first nulling.

12. An underlisted and overlisted list will ARC break the pc
    and he may refuse to be audited until list is corrected,
    and may become furious with auditor and will remain so till
    it is corrected.

13. Listing and nulling or any auditing at all beyond an ARC
    Br without handling the ARC Break first such as correcting
    the list or otherwise locating it will put a pc into a
    "sad effect".

14. A pc whose attention is on something else won't list easily.
    (List and null only with the rudiments in on the pc.)

15. An auditor whose TRs are out has difficulty in listing and nulling and in finding items.

16. Listing and nulling errors in presence of Auditors Code violations can unstabilize a pc.

17. The lack of a specific listing question or an incorrect non standard listing question which doesn't really call for item will give you more than one item reading on a list.

18. You cease listing and nulling actions when a floating needle appears.

19. Always give a pc his item and circle it plainly on the list.

20. Listing and nulling are highly precise auditing actions and if not done exactly by the laws may bring about a down tone and slow case gain, but if done correctly exactly by the laws and with good auditing in general will produce the highest gains attainable.

NOTE: There are no variations or exceptions to the above. (Does not alter 5A Power procedure.)

A failure to know and apply this bulletin will result in the assignment of very low conditions as these laws, if not known or followed, can halt case gain.
