GREEN FORM, S & D

It was found in C/Supervising aboard the RSM that the following additives had been entered and are not altogether correct.

- (1) "Green Form to Free Needle". Not necessarily correct. It may or may not. Each item on the Green Form is independent of the rest. However it can be a serious blunder to continue a GF past an F/N. I have seen TAs then rise.

The only time you would ever do this - (go past an F/N on a Green Form) would be when GIs were not in and the pc still felt he was in trouble. In this case the F/N is probably an ARC Brk needle and an ARC Break should be checked.

- (2) "S & Ds to F/N" (WSU). Not necessarily true. You stop as per listing rules.
