Students

R-FACTOR NOTE

The use of the Gradation Chart in Auditing in using column "Abilities attained" an Auditor may feel "B-But you can't give the pc a goal for the session, that would be breaking #1 of the Auditors Code". "Do not evaluate for the pc". That's Right!

Get sharp. Merely apply HCOB 14, Nov. 65 "Clearing Commands" as far as simply ask the pc what it means to him and when he has totally duplicated those words that's it, you're ready to fly, into the process. (you are letting the pc read the words and letting him cognite on it. Auditing the pc at cause.) Remember you are not releasing the pc in the R-Factor, so don't belabor the point, the individual process handles that.

Ron's hat is well known; Research. Each Auditors job it to Duplicate and Apply the data, not to interpret.

Scientology is a game by which we all win- by using good TR- 8 (creating the space), making the data yours and using Standard Tech., means a smoother, faster line in which to travel.

"STANDARD TECH WORKS"!

Continued study and auditing will help you to know this with Certainty.
