HCO BULLETIN OF 3 February 1969

TRIPLE GRADES

Firm Policy on Triple Grades  
NOT to be violated

Triple grades when released will be run on HGC PCs and Qual only by HGC and Qual Auditors under Class VIII supervision.

Triple grades are NOT taught in the Dianetics Course. They are NOT run by Dianetic students on pcs. Triple grades do NOT change the Dianetics Course. Dianetic Course auditors are forbidden to run Triple Grades. They change NO checksheet on Dianetics Course.

Triple Grades are NOT taught on Levels Zero, I, II, or III. They are NOT run by students on these levels. Triple Grades do NOT change Level O, I, II, III checksheets. Auditors of these classes (O, I, II, III) do not use and are forbidden to use Triple Grades on their own pcs.

CLASS IV

Triple Grades are taught and are added to the checksheet of Level IV. They may be audited by Class IV auditors on their pcs only under the direct supervision of a Class VIII auditor.

HGC auditors and Qual auditors traditionally have been understood to have a right to audit any authorized process under proper supervision. Therefore when auditing under the direct supervision of a Class VIII auditor HGC and Qual auditors briefed on Triple Grades starrate can run them.

CLASS V

A Saint Hill Level V checksheet must have all date on flows added to it and all Triple Grade data.

A Saint Hill Class V may audit, when trained on the new checksheet, Triple Grades on his own pcs or without further supervision. In an org he would of course get Class VIII supervision.

---

Note therefore that Lower Level auditors and Lower Level courses continue as always with single sub-zeroes and single grades both as to training and practical up to but not including Level IV.

---

Note that the remaining two flows of the sub-zeroes and lower grades CAN BE PUT IN on a pc before or even after Power.

You rehab the single grade (by counting times released) and then run its other two flows.

You rehab the next single grade and run its other two flows. The sequence is rehab the grade, run its other two flows. Don't rehab all grades and then put in each other two. This also applies to sub-zeroes.

The best time to do this is BEFORE POWER.

The advantage of triple grades is

1. Greatly increased gain per level.
2. Enormously increased stability for the gains of lower grades.

If and when Triple Power is worked out if it is ever issued, this HCOB still applies.

The exact commands of Triple Grades and the form used on each pc for them are the subject of another HCOB.

Policy is firm that a separate triple grade form is used for each separate pc and included in his folder.
