HCO BULLETIN OF 27 APRIL 1969

Issue II

DIANETIC FAILURES

Dianetics can be made to fail by alteration of its materials from its precise workable application.

It is basically so simple it is hard to conceive that this could happen.

But it has happened several times and was a contributing cause to its lack of use in several areas for some years.

There are various ways to make Dianetics difficult. Most of these come under three headings

1. False information as to how it doesn't work by some vested interest acting as a third party (see HCOB on 3rd Party Law).
2. Failure to provide or get studied the actual data and HCOBs.
3. Mis-instructing which enters an instructor's or examiner's opinion or invalidation or alteration of the actual technology.

A person who pays attention to 1 and 3 and who doesn't insist on 2 is courting failure in auditing. Many many instances exist of each of these three being done and almost all failures one has in auditing can be traced to one of the three reasons given above.

The failures aren't because of the pc or the bad intention of the auditor. Believe that. They came from either not using Dianetics at all or 1, 2 or 3 above. So don't let yourself get caught in these errors given above.
