HCO BULLETIN OF 7 MAY 1969
ISSUE IV

(HCO BULLETIN 21 SEPT. 1965 EDITED
FOR USE ON THE DIANETIC COURSE)

THE FIVE GAEs

The five Gross Auditing Errors (GAEs) are:

- (1) Can't handle and read an E-Meter.
- (2) Doesn't know and can't apply Technical data.
- (3) Can't get and keep a pc in session.
- (4) Can't complete an auditing cycle.
- (5) Can't complete a repetitive auditing cycle.

These are the only errors one looks for in straightening up the auditing of an Auditor.

If you look for other reasons, this is itself a gross goof. There are no others.
