HCO BULLETIN OF 12 JULY 1969

EXTERIORIZATION

Exteriorization is one of the Scientology results that sometimes occur in Dianetic Auditing.

When the PC volunteers to the auditor or the examiner that he is exterior, or looking at the session from a distance, or not in his body and feels good with VGIs he is taken off auditing until such time as he re-interiorizes. This may be a matter of hours or hundreds of years.

An auditor on being told by PC he is exterior, quietly ends the session at once. The C/S action is to get it checked by the Examiner who is told to ask the PC to define and if he is exterior. The folder is marked EXTERIOR OFF AUDITING UNLESS INTERIORIZES.

Exteriorization is not likely to be stable below the OT levels.

An auditing session is never continued beyond exteriorization.

If an exteriorized PC is audited he is likely to get banged back into the body and messed up.

This data is not new but has not previously been written up for the Dianetics Course.
