HCO BULLETIN OF 26 JANUARY, 1970

EXTERIOR AND SEC CHECKS

There are stable data in life and livingness and there are stable data in processing and in organization.

One must be able to tell relative importances, that is where intelligence lies.

In auditing, one is looking for a certain result, and that is the bringing up of the awareness level of a Being. The velocity of Scientology Processing can be as high as to exteriorize a Thetan in the Universe and the stable datum is that one doesn't audit any further until re-interiorization occurs.

Now, in Sec-checking, the stable datum is that one is safeguarding a specific area as to its security. Sec Checks are not auditing actions, and you can actually go as far as not even applying The Auditor's Code in a real dangerous situation. However, an Auditor's good TRs, can always, along with his knowledge-data on sec-checks handling, bring about the results locked for in the first place in sec-checking, and that is DATA one requires in order to handle something or somebody.

So whether the person being sec-checked is exterior or not, you go ahead and do your sec-check. A review can always patch up any upset later. Class VIII data contains tools for any repairs.

So now, if it wasn't fully known to you, or if you had a misunderstood, here you have a stable datum on which to base your actions.

In our society, one has to be smart, sharp and intelligent in all his actions. We are in the field of betterment of the individual and Mankind, whether by processing or sec-checking, really.
