

HUBBARD COMMUNICATIONS OFFICE
Saint Hill Manor, East Grinstead, Sussex
HCO BULLETIN OF 22 APRIL 1970R
REVISED 2 AUGUST 1989

Remimeo
Course Supervisors
Cramming *Officers*
Examiners
Students

(This HCOB was originally written at LRH's directions and approved by him. In 1974 it was incorrectly cancelled and reissued as BTB 22 Apr 70, CLAY TABLE DEMO CHECKOUTS. It was revised in 1977 and issued as BTB 22 Apr 70R [same title]. That BTB is hereby cancelled and the issue is restored as an HCOB and updated. Revisions in script.)

CLAY TABLE DEMO CHECKOUTS

(Note: The data in this issue applies to anyone giving a clay demo checkout, not just Course Supervisors. Reference: HCO PL 21 Feb 71RA, SUPERVISOR CHECKOUTS)

A Supervisor when checking a student's clay demonstrations always checks to see that the student's understanding of the material being demonstrated is present. This is done exactly as outlined in HCOB 11 October 1967, CLAY TABLE TRAINING. The Supervisor has only the materials of the course such as HCO Bulletins, HCO Policy Letters, tapes, textbooks or reference materials to refer to in checking out a demonstration.

If a student's clay demonstration isn't correctly done or doesn't show what is to be demonstrated, the Supervisor must give a "flunk" for it. The Supervisor must also state why it is a flunk with reference to the material. A Supervisor must never refer to another student's demo as an example of a correctly done demo or make an example of a student's incorrectly done demo to other students. Just stick to the course materials and your students will win.

You will find that students' demonstrations will each be unique in their own way of showing the data. The important thing is that the demo does show the data and the student understands it.

A student's clay demo is a personal creation by the student and when properly done is to be highly validated by the Supervisor. A student's clay demo is not something made for public display even to other students.

All a Supervisor is interested in with any student is that the material of the course is duplicated and fully understood by the student. The clay demonstrations of each student will show this.
