INTERIORIZATION INTENSIVE

2 WAY COMM

The Interiorization Rundown (HCOB of 22 March, 1970, "Exteriorization and High TA") is ALWAYS followed in the next session with "2 Way Comm on Interiorization - Exteriorization".

If the Interiorization auditing has to be repaired, that is done first of course.

BUT AN INTERIORIZATION RUNDOWN IS NEVER COMPLETE UNTIL AN ADDITIONAL LATER SESSION IS GIVEN ON 2 WAY COMM ON INTERIOR - EXTERIOR.

A C/S in repairing cases should always look to see if a pc

(1) Has exteriorized at some time during auditing.

(2) If so the only C/S that can now be done is the Interiorization Rundown.

(3) If an Int Rundown has been given, then the C/S must check to see if a later session was given on "2 way Comm Int-Ext".

(4) If this 2 way comm was omitted or not in a separate session then "2 way Comm on Int-Ext" must be ordered even if there have been several intervening sessions.

COG

It is usually the case that the pc did not fully cognite when he had the Int Rundown. His TA may stay high after an Int session. O/R is of little use to get it down. What's missing is the 2 way comm session. In it the pc usually cognites and things then go right.

The current C/S and auditor error is trying to do everything briefly and all at once. Ordering an Int Rundown and 2 way comm on it in the same session would be part of such an erroneous trend.

The 2 way comm must be another session preferably on another later day.

It is a flagrant C/S error to omit "2 way Comm Int-Ext" after an Interiorization Rundown session.

The signal to order an Int Rundown is pc went Ext in auditing or has been found to have gone exterior. Auditing will not run well when the pc is audited past or after exteriorizing.

An Int Rundown must now be ordered.

If unsuccessful it must be repaired.

Successful or repaired, an Int Rundown must be followed by the 2 way comm session.

Two way comm mustbe done with exact TRs. The auditor must not Q and A. He must not evaluate (tell the pc what it's all about).

2 way comm is a precision process. The pc is kept talking, not by giving him commands. He is kept on the subject of Int-Ext (or the 2 way comm subject), not encouraged to leap about by Q and A.

————————

You cannot consider an Interiorization Rundown complete unless followed by 2 way comm.

If the case hasn't had it following his Int Rundown he must be ordered to it.
