C/S Series No. 4

THE RETURN PROGRAM

When a case has been repaired, there is always a Return Program made up by the C/S.

It is hand written on a blue sheet of paper that is easily spotted in a folder.

When the Repair Pgm has been concluded, the case is considered to be "set up" for a Return Pgm.

The exact point where a Repair Program is changed into a Return Program is when the case has had some wins and is in far better shape than he was when he first began to be audited (which means his first ever auditing.)

The point is also identifiable as the point where the person feels more outflowing and less overwhelmed if at all.

This is obviously a point of case change.

The common and incorrect practice of looking for case change as the only benefit from processing should be relegated to Repair End Phenomena.

Processing is actually measured by the gradual increase in ability. Step by step these increases in ability walk up the Class Chart and ability is the measure of progress.

The C/S who is looking for THE solution to a case, the one shattering bang of total effect on the pc has set himself for continuous losses in C/Sing. For there is no one action that totally changes a case from bottom to top in one fell swoop. The C/S who thinks there is continually fiddles hopefully. A case has MANY things to be handled, not one.

There is no one single wrongness or out-point in a case. A case is a collection of out-points. He hurts, he can't talk, he has problems, he is ARC Broken, he has service facs, he is stuck in incidents, etc., to just mention a few such out-points.

A radio receiver that has been many times broken and is a heap of twisted parts, is not going to get repaired, much less improved by a radio repairman finding one huge error in it and correcting that. He'll have to correct a lot of minor errors in it before any major error even shows up.

The "One shot Clear" idea of the uninformed of 1950 is impossible. When a person goes onto the Clearing Course after missing the lower grades he just doesn't make it at all. He often can't even get reads.

It takes many miles of road, past many "case changes" to get up the gradient scale to top ability.

A Repair Program takes the case from where it has falsely gotten to on the Class Chart and gets off the overwhelm with light processes.

The Return Program begins when the case is no longer so overwhelmed and is getting wins from the Repair Program.

THE RETURN PROGRAM CONSISTS SIMPLY OF WRITING DOWN IN SEQUENCE EVERY NEEDFUL STEP AND PROCESS MISSED ON THE CLASS CHART BY THE CASE WHICH ARE NOW TO BE DONE.

Example:

A case has falsely gotten to R6EW Solo and isn't making it well.

The C/S writes up a light process but extensive repair program (first on auditing, then on life).

The case achieves the EP of repair in case changes and less overwhelm.

The C/S now examines the 2 way comm sessions and Examiners reports to establish what levels are out. No change = Level I. Lots of ARC Brks = Level 2.

The C/S lists all the Level I and Level 2 processes the pc did not get done and this is the Return Program.

When these are done and the pc has made it, the C/S has the pc honestly back at R6EW on the Class Chart and continues to follow the Class Chart.

Needful repairs also sometimes have to be done in getting the Return Pgm done. In each case a new Repair Program is done. The old Return Program looked over but probably just continued.

Example of a case at OT I now completely repaired:

Case has somatics = Dn Level Unflat

Makes Others Guilty = Level IV Unflat

Dramatizes = R6EW Unflat.

The Return Program consists of completing Dn. rehabbing comm, all Level IV processes, Redo R6EW, rehab Clear, return to OT I.

That completes the Return Program.

In other words, when the case, found in trouble at a level, is fully repaired and winning, the C/S studies the current data on the case to establish the major levels that are out (each Level has an error and an ability) and then gets these into a Program which then session by session is followed.

The program which can be completed in one session will never be written as there is no such program.

A program is the consecutive layout of what has to be done in the next many sessions.

The basic program is the Class and Grade Chart.

The Return Program is the return to the false point reached by getting honestly done all the points missed on the road.

The pc who can't attest a grade ability at any point has to have a

(1) A Repair Pgm.

(2) A Return Pgm.

It is a truism that the Grade he can't seem to make is not the grade. An earlier grade is out if the processes of any one grade, properly run, do not achieve that grade.

The earliest error is of course a failure to achieve the lowest grade there is. What is out here is that the case needed to be <u>started</u> on a Repair Pgm for life. Now, that skipped, one has to do a Repair on both auditing and life.

The Return Pgm is easy in this instance as it just puts the pc back on what he was on, the first level. But this is the <u>only</u> instance where a pc is restored by the C/S to the level he was on without an extensive Return Program.

So a Return Pgm always follows the Repair Pgm.

And a Return Program consists of putting the pc over road sections he missed on the road up.

A Return Pgm is concluded and retired when the pc is back on the grade he falsely had reached before the Repair and Return were done, and is now making that grade.
