**NEW USES FOR THE GREEN FORM**

The Green Form comes into its own with a new method of use.

A lot of cases have been cracked lately using the GF in a new way.

Designed as *the* Qual tool in 1965 it came into disrepute by getting assessed item by item to an F/N. This made it F/N on a rud.

Thus the whole battery of tricks in the GF never get used on a pc.

There is another assessment Method. Method 5. It is "once through marking the length and BD of all reads".

One can then C/S "Assess GF once through".

Actually one usually says

"GF + 40 Method 5".

This means the auditor (usually on a case that is messy or just as a routine part of a Progress Program) just rat-a-tat-tat assesses the lot, marks the reads length and BDs.

The C/S action that follows—the "Handle" consists of putting a red half swirl around each that read and then doing the C/S for it.

List outness is always handled first. Then ruds like ARC Brks, W/Hs and PTPs. Then more or less by the longest reads.

It makes a long, long C/S in cases that are boggy.

One uses engram running on it whenever he gets a chance as in "drugs".

Hidden standards are listed on a "who what wd have \_\_\_\_\_ (the symptom)?" and "O/W on the item found".

A lot of old processes get a chance on these GF reads. It isn't all "2 way comm on \_\_\_\_\_."

Foreign Language cases who do not have English as a native tongue and people who don't understand a lot have to have the GF items cleared. One takes the reads while clearing the Question, of course.

Designed as a Case Cracker, this new use of the Green Form restores it to a mighty weapon.

Since I redeveloped ways to assess and began to really use this Green Form, I've seen several very rough ridgy cases fall apart.

So it is a very cheerful re-discovery. And it is highly urged.
