DIANETICS AND INT RD REPAIR LIST

This list includes the most frequent Dianetic errors.

A high or low TA and a bogged case can result from failures to erase a chain of incidents.

DO NOT ATTEMPT TO REPAIR A CHAIN OR ENGRAM WITHOUT USING THIS LIST as it can have different or several errors.

REMEMBER TO CLEAR EACH WORD ON THIS LIST. IF A QUESTION READS AND THE PC SAYS HE DOESN'T UNDERSTAND IT, CLEAR IT AND REASSES (don't explain it and take it as it read on a misunderstood not on a fact).

RUNNING PCS ON DIANETICS WITHOUT A FULL AND COMPLETE DNC/S INDOCTRINATION IS A FOOLISH ACTION.

TAKE ANY READ FOUND TO F/N BY FULL REPAIR OF IT PER THE INSTRUCTIONS.

1. WAS THERE AN EARLIER SIMILAR INCIDENT?
Indicate it. Run the chain to full EP.

2. WAS THERE NO EARLIER SIMILAR INCIDENT?
Indicate it. Determine if the chain erased or if the last incident needs to be run through again. Complete the chain to full EP by indication or by running it to full EP.

Scn handling would include Date/Locate if needed.

3. WAS THERE AN EARLIER BEGINNING?
Indicate it. Handle with R3RA and complete the chain to full EP.

4. WAS THERE NO EARLIER BEGINNING?
Indicate it. Complete the chain to full EP. R3RA DEF on last incident if unflat.

5. WAS AN F/N INDICATED TOO SOON?
Indicate it. Run the last incident (or chain) to full EP.

6. DID THE AUDITOR STOP JUST BECAUSE THERE WAS AN F/N?
Indicate it. Complete the chain to full EP using commands DEF on the last incident run.

7. WAS AN F/N INDICATED TOO LATE?
Indicate it. Spot the point of erasure, indicate the overrun. (Scn handling would include D/L if needed.) Get the full EP. Then, if pc jumped to another chain, get last incident pc ran on the jumped-to chain and do an L3RE on it.

8. WAS AN F/N NOT INDICATED AT ALL?
Indicate it. Spot the point of erasure, indicate the overrun. Get the full EP. Then, if pc jumped to another chain, get last incident pc ran on the jumped-to chain and do an L3RE on it. Scn handling would include D/L if needed. _____
9. WAS THERE NO CHARGE ON THE ITEM IN THE FIRST PLACE?
Indicate it, and that it shouldn't have been run. Scn handling would include D/L if necessary. _____
10. DID YOU JUMP CHAINS?
Indicate it. Reorient to the original chain, spot erasure if there was one, indicate the overrun, or run the chain to full EP. Then locate last incident pc ran on the chain he jumped to. As this has now been restimulated but not run, do an L3RE on it. Scn handling would include D/L if necessary. _____
11. DID YOU JUMP FLOWS?
Indicate it. Reorient to the original chain and take it to full EP using commands DEF. If necessary and the pc is still upset about the other flow, do an L3RE on it. _____
