HCO BULLETIN OF 22 OCTOBER 1971  
Issue II

HQS Co-Audit

(HCOB 9 OCTOBER 1967 with additional  
information for use on the HQS Co-audit.)

ASSISTS FOR INJURIES

Do not run a touch assist when the exact spot is available  
for a CONTACT ASSIST.

In a CONTACT ASSIST you take the person to the exact spot  
where the accident occurred. Then have him duplicate exactly  
what happened at the time of the incident.

For instance, if he hit his head on a pipe, have him go  
through the action of putting his head against the exact spot  
on the pipe, having the pipe also touch the exact spot on his  
head. He should be duplicating the whole thing. That is,  
the rest of his body should be in the position it was at the  
time of the accident. If the object is hot, you let it cool  
first, if current was on you turn it off before doing the  
Assist.

If he had a tool in his hand, or was using one, he should  
be going through the same motions with it.

Have the person repeat this several times, until the  
somatic occurs again. It will occur and blow off when he  
exactly duplicates it.

Ask him how it's going; has the somatic occurred. End  
when you get this phenomena of it turning on and blowing off.  
The full End Phenomena is Pain Gone and Cognition.

If the spot is not available, you do a TOUCH ASSIST.  
This is run on both sides of the body. It is run until the  
somatic turns on and then blows.

It is run around the injury and especially below the  
injury; i.e., further from the head than the injury.

It is a good idea to have the person shut his eyes so  
that he is definitely looking "through" the area of the injury  
in order to tell that you are touching him.

Just use a simple command like "Feel my finger. Thank you."

Before or after the Assist, depending on the seriousness  
of the injury report the injury to the Medical Officer.  
Report also the Assist, length of time, somatics, nature of  
the injury, how it was run and on whom, in writing. Following  
the session the pc should be taken to the Examiner.
