C/S COMMENTS_____

The purpose of this list is NOT to solve the case but to make Int cease to read and be clean as a subject by Isolating the exact outnesses.

The list is used:

(a) When a repair list, (e.g. HCOB 21 July 71 (Revised) Questions 1, 2, 3), or any other repair list with the subject of INT EXT on it reads, and the Int RD has already been done or corrected.

(b)When a bog occurs in the Int RD itself.

(c) If the pc is upset after the Int RD, and/or TA has gone High or Low.

Assess this list once through noting reads (Method 5).

Take all reads to F/N or get the reading item fully repaired to F/N. This list is laid out in the sequence the reads are to be handled. Suppress and False can be used as needed to take a question to F/N. Handle each read to F/N, do not go on to another question leaving one that has not F/N'ed.

R-FACTOR. WE are going to do an assessment concerning your Int R/D.
