IMPORTANT

END PHENOMENAS

Feeding the pc the End Phenomena of a process or action is illegal and very out-tech.

Example: Auditor asks pc "Since the last session did (stating the E/P)."

Or "In this session did (stating the E/P)."

This is evaluating for the pc. The pc has to make it himself then he truly makes it.

The correct way to check to see if a pc has made an E/P (rare as pcs usually tell their auditor their cogs etc) would be to ask "Did anything occur." or "Since your last session did anything occur?" If the pc then states the E/P or words to that effect, with F/N and VGIs, the process can be terminated or if necessary, rehabbed and terminated. If the pc does not state the E/P the auditor then knows to continue the process.

These actions apply very definitely to Power Processing - where earlier HCOEs state the auditor can check to find out if the EP occurred between sessions.

Usually sessions aren't ended before F/N, VGIs and E/P on a process. It's easier on the C/S, auditor and pc to complete a cycle of action in the one session.
