HOW TO WRITE UP A CRAMMING ORDER

There is a certain technology on how to write up a Cramming Order.

- (1) Isolate the exact outnesses in the folder.
- (2) Order those HCO Bs or PLs crammed.
- (3) Now look in a slightly wider circle around the data flunked and get which basio is involved (ie Auditors Code, TRs, metering, handling the session, handling the pc as a Being, etc) and get that crammed, too.

The C/S can have a feeling the Interne or Auditor is doing something peculiar in a certain area (eg weak TR 1, or slow TR 2, or can this auditor see the pc, meter and worksheets all in the same range of vision?) and request that this be looked into and handled.

There is a great spirit of co-operation between the Cramming Officer and the C/S.

Together they are building a better bridge in their org and keeping Scientology working.
