HCO BULLETIN OF 3 JANUARY 1972R
REVISED 20 JUNE 1989

Remimeo
Auditors
Interns
C/Ses

(This bulletin has been revised to delete references to cancelled BTB 12 Dec 71RA, C/S Series 69RA, MANDATORY C/SING CHECKLIST which was written by another and later found to be destructive. The HCOB has been retitled and the word "Addition" has been deleted from its C/S Series number. Revision in script.)

C/S Series 69

REPAIRING A CASE

(Previously entitled C/S Series
69 Addition, C/SING CHECKLIST)

The time-honored way of seeing what has to be repaired in a case not running well is:

GO BACK IN THE FOLDER TO WHERE THE CASE WAS RUNNING WELL AND COME FORWARD.

The major error or departure is in the very next session after that. The bugs after the high point should be repaired as the fast action to set the case going again.

The repair and handling of bogged cases is the finest skill of a C/S. Really it is why he is there.

To do this he has to know the C/S Series thoroughly, know all the materials of all levels he is C/Sing better than the auditor.

The use of prepared lists, WC Correction List, Green Form, C/S 53, GF 40 RR, Int-Ext Corr List, L1C and others, including "Have Examiner ask the pc what happened in session" are used to get information and correct as well as folder studies. KNOW BEFORE YOU GO.
